COTTON. Our cotton market ruled firm yesterday at Monday's advance. The demand was good, sales aggregating 400 bales. From New York and New Orleans advices come of a fur-ther advance, while Liverpool reported an up-ward tendency. Receipts at United States ports since the first of September are 6138 bales, against 18,229 bales for the corresponding time last year, showing a decrease of 2,091 bales. The New York Bulletin says that market last Friday: "Values have again ranged higher, and in a general way position of the market appeared to show ontinued strong undertone, though sellers not retain the full advantage. On spots reather for examining samples and handling stock, was very good, with buyers bidding up promptly and making no very decided objection to cost. Indeed there was a tendency to buoyancy, which resulted in an advance on quotations of 1-16c per pound, with the feeling pretty firm at the close, and the offering neither free nor anxious. From exporters we could learn of no direct call. On contracts the opening was higher, and followed by a still further advance along pretty much he entire line, old influence of light urrent receipts, poor prospects for any im-nediate addition, and further unfavorable counts from the crop, both as regards the ruction by worms and the condition of weather forming basis for improvement. for a time bidding was spirited, but after a gain had been made of some 10@11 points over last evening the offering increased, and a break took place of some 5@6 points, on which there f some 5@6 points, on which there ere small fluctuations, with the final

In offering to planters and merchants the Grip Tie, the following advantages are claimed for it: Simplicity of application, greater strength both of the Tie and Band, close adjustment and freedom from slip, which prevents any expansion of the bale, and the impossibility of removing the band without cutting it.

ting it.

The importance of these advantages must be evident to planters, especially the greater strength of the bands. Whenever the band breaks the cotton is liable to be wasted or pilfered; besides, most local freight rates on railroads and steamboats are so much per bale, also drayage and storage. Hence the importance of putting up heavy bales at plantation presses.

The strength of the Grip Tie is from 2800 to 3000 presses.

The strength of the Grip Tie is from 2800 to 3000 presses.

The strength of the Grip Tie is from 2800 to 3000 pounds. For compressing cotton bales we defy competition—and this, in the future, is to determine the merit of cotton ties, as the closer the cotton can be compressed the cheaper it can be transported from one point to another.

The recent reduction in the price of Ties was prebably due to the competition of the Grip Tie. All are sware that the American Tie Company have for gears had a monopoly in the Tie business. This they have placed in the hands of all dealers with whom they could contract to keep no other Tie in stock, endeavoring thereby to drive out all competition. Therefore, we claim it is to the interest of all consumers of Ties to use the Grip Tie. First, because it is superior in every respect to the Arrow Tie, second, because you are assisting to throw off the shackles of a monopoly.
